

Fun & Easy, Step by Step ELECTRONIC INVENTIONS Workshop

Mentors on hand to guide you!

This unique project provides beginners an opportunity to learn build Electronics and Robotics projects.

Past project examples include home alarm, fridge door open alarm, Light Dimmer, Washing machine control, reaction games, light controlled musical instrument, soil moisture level alarm, model train crossing, flashing bike lights etc.

ezSystem helps you to quickly build dozens of projects with the help of University Mentors.

As long as you are interested, age is not a limitation!
